New Tastes of
Awamori in Okinawa

Clockwise from above: The largest guestroom at the Malibu Hotel is the Malibu Suite; the sea and Mt. Fuji can be seen from all the guestrooms at the hotel; original cocktails are served at the hotel's Malibu Farm.

Malibu Hotel

Just as the island of Enoshima is a symbol of Kamakura, so Mt. Fuji symbolizes Japan. At Malibu Hotel, which opened in March, guests can enjoy the elegance of those two landmarks in complete privacy. The hotel is located in Riviera Zushi Marina, a marina resort with restaurants located close to Kamakura. It has 11 guestrooms (all suites), each offering views of Mt. Fuji and Enoshima across Sagami Bay. The guestrooms also have terraces and balconies, allowing guests to see fine views while enjoying room service meals.

During their stay, guests can take part

in such activities as fishing and garden yoga or enjoy spas. Sunset cruises are planned on which guests can see the famed sights of Kamakura.

Also located within Riviera Zushi Marina is the first branch in Japan of Malibu Farm, a chain of restaurants originating in Malibu Pier, Los Angeles. At Riviera Zushi Marina, Malibu Farm offers exclusive dishes containing fresh local vegetables and seafood landed in Sagami Bay. This luxury resort captures the distinctive character of Kamakura and is ideal for relaxing with friends or loved ones.

SEA AT KAMAKURA

One of the dominant features of Kamakura is its beautiful sea. The water remains shallow far out to sea, and the waves are gentle. The nineteenth-century ukiyo-e artist Hiroshige captured the view in *Sagami Shichirigahama*, one of his *Thirty-six Views of Mount Fuji* series of woodblock prints. The view has been admired since ancient times and been the subject of various artworks.
